Subject: microsoft settlement

I wish to add my voice to the many Americans who believe that the settlement agreed to by Microsoft is in the best interests of the economy and the thousands of children whose education in the area of informational technology and computer skills will be wonderfully enhanced. Despite the obvious public benefits of this settlement, nine different states refuse to settle, hoping to get more cash to pour into the black sink hole of state coffers and into the pockets of the lawyers urging them on. Their cavalier approach ignores the long term benefits of the innovations of Microsoft and their positive impact on all Americans. Enough of the Microsoft bashing. Let's get on with it and, in doing so, encourage Microsoft to continue to lead the way to even more invention and innovation in this exciting realm.
